**Rope access Inspection, Maintenance and Repairs**

**MME Group**
The MME Group consists of four specialized operating companies with their own divisional structure. Material testing, inspection and corrosion prevention are the main activities. After a successful start in the marine industry the company has steadily expanded, allowing an optimum in synergy between these activities. After more than 50 years the vast knowledge and skills applied daily are still steadily increasing. A well devised certification structure guarantees our customers an accurate and professional execution of their orders. A Longer Life - that is the mission put into practice with our dedicated staff.

**Rope Access**
Rope access is one of the safest and fastest methods of working at heights where ropes and other equipment are used to gain access to difficult to reach work locations, without the use of scaffolding, cherry pickers and platforms. By this runtime and costs will be reduced and safety will increase to a very high standard.

MME Rope Access is a fully subsidiary of MME Group and is working according the IRATA Code of Practice, and with this meeting the highest and safest procedures for working at heights.

**Service portfolio**
MME Group provides rope access solutions for:
- Maritime services and inspections
- Non-Destructive Testing and inspections
- Video inspections (CCTV)
- Project Management
- Rigging and lifting projects
- Maintenance and repairs

Under the title of maintenance and repairs MME Rope Access provides among them:
- application of coating systems (incl. grinding and blasting)
- construction and steel repairs
- demolition activities
- industrial cleaning
- installation activities

**Worldwide service**
The most important reason for MME Group’s leading position in the area of non-destructive testing and technical services, is our commitment to our clients.

We provide our rope access services worldwide, in every imaginable situation or work location. Nonetheless, the working method that we ultimately use will be adjusted to our client’s specific needs and wishes.

A few of the rope access projects MME Rope Access has carried out in the past includes petrochemical sites, vessels, drilling rigs, FPSO’s, offshore wind turbines and infrastructure objects. Of course these are only examples, the possibilities are virtually unlimited.
MME Group
